## SPTAJZF-A1

Left-Right Inverse Timing Relay – 0.1s..240h (0.1 seconds – 240 hours)

## Main

<b>Range</b>	Time Relays
<b>Function</b>	Left – Right Inverse Timer
<b>Code</b>	SPTAJZF-A1
<b>Width</b>	18 mm
<b>Time Delay Range</b>	0.1S-240h (0.1 seconds - 240 hours) (Adjustable)
<b>Operating Voltage</b>	AC/DC 24-240V (50-60Hz)
<b>Weight</b>	98 grams

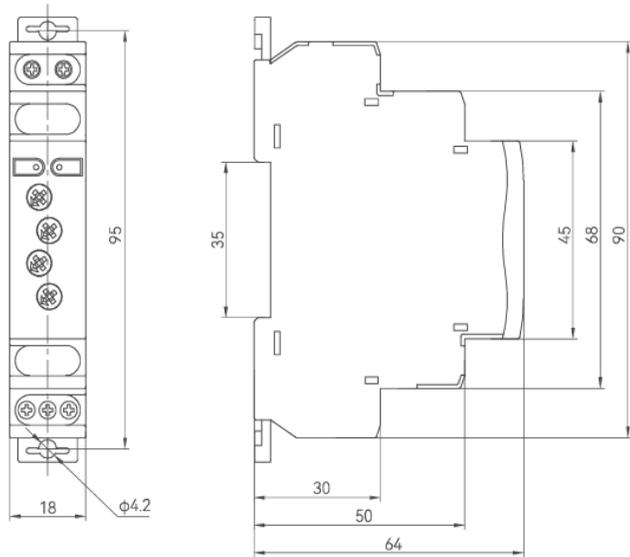

## Specification

<b>Output Configuration</b>	2 x SPDT
<b>Delay Setting Method</b>	Rotary adjustment
<b>Delay Accuracy</b>	Repeat Error <0.5%, Mechanical error <10%, Bias Error <0.1%, Voltage jump error <0.5% , temperature fluctuation error <0.05%/C.
<b>Reset Time</b>	<500ms
<b>Indicator Light</b>	The green LED indicator is always on when R2 is closed, and flashes for 0.5s when R2 is disconnected to indicate that it is in the running mode Red LED indicates R1 status in real time
<b>Mechanical life</b>	1x10 <sup>5</sup> (Resistive load, room temperature, 1s on & 9s off)
<b>Output contact capacity</b>	AC/DC 24-240V Power supply 10/16A (AC1-Resistive)
<b>Height</b>	90 mm
<b>Depth</b>	64 mm
<b>Environment</b>	Working temperature: -10-55°C Relative humidity: ≤85% Altitude: ≤2000 meters Storage temperature: -20-75°C, no rain, snow, salt fog and corrosive
<b>Protection Degree</b>	IP20
<b>Housing Material</b>	Self-extinguishing
<b>Installation Method</b>	35mm Din rail type

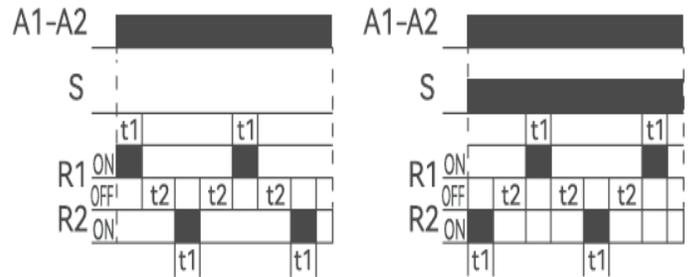

## Features

The forward and reverse automatic cycle controller is a time control unit that can be set. According to the required time, the output contacts are alternately cycled to control the switch state of the electrical equipment, so that the working time of the terminal equipment can be controlled. Mainly used in electrical automation equipment, street light switch, AC motor control, etc
